PROFILE

Full Stack Developer with 5+ years of experience building scalable SaaS platforms and microservices. Expert in Python (Django, FastAPI), PostgreSQL, React.js, and cloud deployments. Delivered high-performance REST APIs, optimized back-end systems, and built responsive React front-ends for production applications. A strong contributor to start-up teams, providing real-time features and cost-effective cloud solutions.

SKILLS

Backend Development: Python (Django, FastAPI, Flask), REST API Design, Microservices, GraphQL
Frontend Development: HTML5, CSS3, JavaScript, React.js, Redux Toolkit, Tailwind CSS, Bootstrap
DevOps & Cloud: Docker, Redis, AWS (EC2, S3, RDS, CloudFront, SQS), Azure Services, CI/CD Pipelines
Databases: PostgreSQL, MySQL, MongoDB, Database Optimization
Other Technologies: Celery/RabbitMQ, WebSockets, JWT/OAuth, Stripe/Payment Systems, OpenSearch

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Contract)

Sep 2025 – Present
Remote, United States

Turing

- Analyzed and triaged GitHub issues across major open-source Python repositories.
- Set up and configured repositories including Dockerization and environment setup.
- Evaluated unit test coverage and reliability across multiple complex codebases.
- Ran and modified codebases locally to assess LLM performance in real-world debugging scenarios.
- Collaborated with AI researchers to identify complex repos and edge-case issues.
- Led and mentored junior developers, providing code reviews and technical guidance.
- Contributed to AI x Software Engineering initiatives enabling autonomous debugging tools.

Stack: Python, Docker, GitHub, LLMs, Open Source, Code Analysis

Senior Python Developer

Dec 2024 – Present

MentorSol

- Built 15+ FastAPI/REST endpoints powering core SaaS features for 10,000+ users, boosting usage by 40%.
- Architected microservices infrastructure, cutting average API response time by 60%.
- Set up CI/CD with GitHub Actions and Docker, reducing deployment time from 2 hours to 8 minutes.
- Secured auth systems using OAuth2 and JWT with RBAC across services.
- Led caching and async queues with Redis and Celery, ensuring zero downtime during peak loads.
- Mentored junior developers, boosting team throughput by 35%.

Stack: Python, FastAPI, Django, PostgreSQL, Redis, Docker, AWS, CI/CD

Backend Engineer

Nov 2022 – Dec 2024

ProjectZ

- Built secure Django REST APIs for healthcare data (2M+ monthly API calls).
- Optimized PostgreSQL performance with indexing, reducing query latency by 40%.
- Integrated Stripe for subscription billing, increasing monthly revenue by 22%.
- Enabled real-time notifications via Django Channels and WebSockets.
- Monitored reliability with Prometheus and Grafana dashboards.

Stack: Django, Celery, PostgreSQL, Docker, AWS, Stripe, WebSockets

Backend Developer (Full Stack)

Jan 2020 – Nov 2022

Irha Tourism

- Developed Django backend and REST APIs for tourism platform (5,000+ annual bookings).
- Built role-based admin panel with React and DRF for operations staff.
- Implemented email/SMS notifications and deployed via Docker on AWS EC2.
- Cut infrastructure costs by 25% through autoscaling and cloud optimization.

Stack: Django, React, PostgreSQL, Docker, Tailwind CSS, AWS

ACHIEVEMENTS

- Built and deployed production SaaS backend used by 50,000+ users with 99.99% uptime
- Reduced API response time by 60% by refactoring monolith into microservices
- Launched CI/CD pipelines, cutting deployment time from 2 hours to 8 minutes
- Increased system revenue by 22% through Stripe subscription integration

EDUCATION & LANGUAGES

BSc in Computer Science, Superior University, Lahore
CGPA: 3.3/4.0

Languages: English (Proficient), Urdu (Native)
